ROBOTICS CLUB IN ST. LAWRENCE HIGH SCHOOL

The students of St. Lawrence High School were much surprised and happy at the introduction of the Robotics Club. On 31st March, a special assembly was held where the members of the Robotics Club under the able guidance of Mr. Gaurav Nahata and Mr. Akash Sethia, who also happen to be the mentors of the Robotics Club, demonstrated several kinds of robots assembled by them. Everyone marvelled at how easily robots can be made and students were thrilled to learn the science behind this. The Robotics Club now regularly functions in school and the whole school awaits their next demonstration very soon.

TIN AND CAN EVENT IN ST. LAWRENCE HIGH SCHOOL

For the first time ever St. Lawrence High School introduced the “Tin and Can” event where students who are not professional players were given the opportunity to play football and showcase their talent. On 23rd April, the whole school inclusive of students, teachers, parents and the Sloba members gathered at the Aloysius and Xavier ground

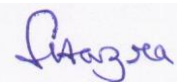

respectively to witness this special event. Students from class V to XII participated in the event. And this was not all as the teachers, non-teaching staff and the Sloba members also played against each other and these matches were the show-stopper matches of the day. Everyone went back to their school days and played like kids. Each and all enjoyed themselves and Father Principal Sebastian James S.J.

deserves a special mention for being supportive of this idea from the beginning till its culmination and also for hosting a special dinner for everyone. This was such an unique event which will be remembered by all for many more days to come.

EDUCATIONAL TRIP TO CHINA

On 3rd May, a special assembly was held in St. Lawrence High School where Reverend Father Principal Sebastian James S. J. formally announced the honour given to St. Lawrence High School by the Consul General of China. Higher Secondary students of the school are invited for a fully sponsored educational trip to China. St. Lawrence considers itself privileged to have such an opportunity. In this context it is worth mentioning that The Principal and school authorities are overwhelmed and have left no stone unturned to make this golden opportunity available to meritorious Lawrencians to explore, unravel and experience diverse cultural environments so that they may have a broader outlook and perspective towards life beyond the classroom.
