

Aparajita Mondal; Pratyak Kabi 9.8.19
ST. LAWRENCE HIGH SCHOOL
 A JESUIT CHRISTIAN MINORITY INSTITUTION

Second Term Examination – 2019

Sub: Mathematics Model Answers

Class: 5

F.M: 80

Duration: 2Hrs 30 Minutes

Date: 08.08.2019

GROUP- A

1. Choose The Correct Option:

1X5=5

a) $\frac{3}{4} \times 10 = ?$

- i) 8 ii) 5 iii) $\frac{15}{2}$ iv) None of These

Answer: (iii) $15/2$

b) Converting $\frac{1}{1000}$ into decimal we get

- i) 0.0001 ii) 0.001 iii) 0.01 iv) None of These

Answer: (ii) 0.001

c) A polygon having seven sides is called

- i) Nonagon ii) Decagon iii) Heptagon iv) None of These

Answer: (iii) Heptagon

d) The Sum of the angles of a triangle is equal to

- i) 90° ii) 180° iii) 360° iv) None of These

Answer ii) 180°

e) The distance around the circle is called

- i) Radius ii) Circumference iii) Centre iv) None of These

Answer: (ii) Circumference

2. Fill in the blanks:

1x5=5

a) Converting $\frac{7}{10}$ into percentage we have _____. Answer: 70%

b) Dividing 5 by $\frac{1}{3}$ we get _____. Answer: 15

c) Place value of 7 in 25.007 is _____. Answer: 7 thousandths

d) The sum of the measures of any two sides of a triangle is always _____ than the third side. Answer: Greater

e) Half of a circle is called a _____. Answer: Semi- Circle.

3. Write Down True or False:

1x5=5

a) Radius of a circle with 8 cm diameter is 3 cm. Answer: False

b) Converting $\frac{3}{4}$ into percentage we get 75%. Answer: True

c) 4.80 Kg is heavier than 4.56 Kg by 0.25 Kg. Answer: False

d) 2.62, 12.64, 0.48 are all like decimals. Answer: true

e) Volume of cube is : side X side X side. Answer: True

4. Match the following .1x5=5

Column A	Column B
i) Converting 0.82 in fraction we get	i) One end point
ii) 8.75×100	ii) 500 gm
iii) 50% of a Kilogram	iii) $\frac{82}{100}$
iv) A Ray has	iv) Cuboid
v) Match Box	v) 875

Answer:

Column A	Column B
i) Converting 0.82 in fraction we get	iii) $\frac{82}{100}$
ii) 8.75×100	v) 875
iii) 50% of a kilogram	ii) 500gm
iv) A Ray has	i) One end point
v) Match Box	iv) Cuboids

5. Answer the following.

1x5=5

- a) How much percent is 10 of 50?

Answer: 20%

- b) Divide 90 by 1000.

Answer: 0.09

- c) Find the place value of 3 in 31.10.

Answer: 3 tens.

- d) Divide $\frac{6}{7}$ by $\frac{1}{49}$.

Answer: 42.

- e) Find the Least Common Denominator of $\frac{3}{4}$ and $\frac{6}{25}$.

Answer: 100

GROUP- B

6. Answer the following questions.

(2X4=8)

- (a) Find the area of a rectangle if length is 12 cm and breadth is 8 cm.

Answer: Area = $(12 \times 8) \text{cm}^2 = 96 \text{cm}^2$

- (b) Draw a triangle in which two sides are 5 cm each.

Answer:

- (c) Draw intersecting lines and label it.

- (d) Draw parallel lines and label it.

7. Answer the following questions (any four)

(3x4=12)

(a) Price of one pen is Rs.12. If you have Rs.400 how many similar pens you can buy? How much money Left after buying?

Answer: Price of one pen is Rs.12.

Money available for buying is Rs.400.

So number of pens can be bought $\text{Rs.}400 \div 12$ i.e. 33 pens. Money left after buying = Rs. 4

(b) Divide 32.841 by 9 and find the quotient and remainder if exist.

Answer: $32.841 \div 9$ the result is quotient is 3.649.

(c) Draw non-collinear points and give name of those points.

Answer:

(d) With the help of protractor draw an angle of 120° and give name of that angle.

Answer:

(e) Find the perimeter of a triangle if measurement of three sides are 12 cm, 10 cm, and 8 cm.

Answer: The perimeter of a triangle = Sum of its three sides.

$$= 12\text{cm} + 10\text{ cm} + 8\text{cm}$$

$$= 30\text{cm}$$

(f) If area of a square is 64 sq cm, what is the side of the square?

Answer: Area of a square = side x side

$$\text{Therefore Side} = 8\text{cm}$$

GROUP- C

8. Answer the following questions (any seven)

(5X7=35)

(a) If area is 25 sq m, height is 5 m, calculate volume.

Answer: Volume = Area x Height

$$= 25\text{ sq m} \times 5\text{m}$$

$$= 125\text{ cubic meter}$$

(b) If length is 8m, breadth is 10m and volume is 560m^3 calculate height.

Answer: We know that Volume = Length x Breadth x Height

$$560 = 8\text{m} \times 10\text{m} \times \text{Height}$$

$$\text{Height} = 560/80$$

$$\text{Height} = 7\text{m}$$

(c) Cost of 8 pencil boxes is Rs.720. If you want to buy 12 pencil boxes how much money is required?

Answer: Cost of 8 pencil box is Rs. 720

$$\text{Cost of 1 pencil box is Rs. } 720 / 8 = \text{Rs. } 90.$$

$$\text{Cost of 12 pencil boxes is Rs. } 90 \times 12 = \text{Rs.}1,080$$

So Rs.1,080 is required for buying 12 pencil boxes.

Cost of 12 pencil boxes is Rs. $90 \times 12 = \text{Rs.}1,080$

So Rs.1,080 is required for buying 12 pencil boxes.

(d) Draw a circle with the help of a compass in which radius is 3 cm

Answer:

(e) Draw a right triangle and give name of the triangle.

Answer:

(f) Draw an angle of any measurement, label it and also mark 3 points in the Interior, 3 points in the Exterior of the angle.

Answer:

(g) Mr. Mukherjee has to pay tax Rs. 14,000. If he has been able to pay Rs. 3,500, what percent of the Total tax has he paid?

Answer: Percentage of tax he has paid = $\text{Rs. } 3,500 / \text{Rs. } 14,000 \times 100 = 25\%$

(h) In a shooting competition, team A scored 123.5 points and team B scored 78.75 points. By how many points did the winning team win?

Answer: Team A scored 123.50 points
Team B scored - 78.75 points

44.75 points

Winning team win by 44.75 points.

(i) How many bricks of size 15cm X 6cm X 3cm will be needed to build a wall of size 45cm X 12cm X 5cm?

Answer: Measurement of the wall = $\{ 45 \times 12 \times 5 \}$ cm = 2,700 cubic cm.

Measurement of Bricks + $\{ 15 \times 6 \times 3 \}$ cm = 270 cubic cm.

So, number of bricks required = $2,700 / 270 = 10$ bricks.
