# ST. LAWRENCE HIGH SCHOOL

## A Jesuit Christian Minority Institution

### WORKSHEET – 9

### Topic – Network Topologies and architecture

Subject: COMPUTER SCIENCE        Class - 12                    F.M:15

Chapter: Network Topologies and architecture                    Date: 15/05/2020

1. A term that refers to the way in which the nodes of a network are linked together.
   a) network
   b) topology
   c) connection
   d) interconnectivity

2. A _____ topology is a special type of structure in which many connected elements are arranged like the branches of a tree.
   a) Ring
   b) Tree
   c) Bus
   d) Star

3. The participating computers in a network are referred to as:
   a) Clients
   b) Servers
   c) Nodes
   d) CPUs

4. A _____WAN can be developed using leased private lines or any other transmission facility
   a) Hybrids
   b) peer-to-peer
   c) Two-tiered
   d) Three-tiered

5. It is a topology for a Local Area Network in which all the nodes are connected to a single cable.
   a) Bus
   b) Ring
   c) Daisy chains
   d) Star

6. Which of the following is a basic network topology?
   a) mesh
   b) ring
   c) Bus
   d) All of these

7. Which of the following is a basic network topology?
   a) tree
   b) point-to-point

c) multi-point
d) All of these

8. In a _____ relationship, the link is shared equally between devices.
   a) peer-to-peer
   b) point-to-point
   c) master-slave
   d) All of these

9. _____ is a network topology in which each node connects to exactly two other nodes, forming a single continuous pathway for signals through each node.
   a) Bus
   b) Ring
   c) Mesh
   d) Star

10. In which of the following, every host is connected to a central hub?
    a) Bus
    b) Ring
    c) Mesh
    d) Star

11. _____ is a type of networking where all nodes cooperate to distribute data amongst each other.
    a) Bus
    b) Ring
    c) Mesh
    d) Star

12. Devices in a ring or mesh topology are usually configured in a _____ relationship.
    a) peer-to-peer
    b) point-to-point
    c) master-slave
    d) All of these

13. A network in which every computer is capable of playing the role of client, server or both.
    a) peer-to-peer
    b) LAN
    c) client -server
    d) All of these

14. Central Computer which is powerful than other computers in the network is called as:
    a) server
    b) client
    c) hub
    d) switch

15. Machine that places the request to access the data is generally called as:
    a) server
    b) client
    c) hub
    d) switch
