

ST. LAWRENCE HIGH SCHOOL

TOPIC: MOVEMENTS OF THE EARTH

Sub: Geography

Class: 5

F. M. 15

WORKSHEET NO. 12

Date: 25.4.2020

OBJECTIVE QUESTIONS

Choose the correct option : 1x15=15

- 1) The shape of the Earth is very near to a -
a) cube b) sphere c) cylinder

- 2) The exact shape of the Earth can be defined as -
a) Geoid b) Ellipsoid c) Spheroid

- 3) The Earth is slightly flattened (at the) -
a) centre b) poles c) all over

- 4) The miniature model of the Earth is the -
a) map b) picture c) globe

- 5) The Earth is slightly bulging (at the) -
a) centre b) poles c) all over

- 6) The imaginary line passing through the centre of the Earth joining the 2 poles is the
a) Orbit b) Axis c) Equator

- 7) The Earth's axis is tilted at an angle of -
a) $66\frac{1}{2}^{\circ}$ b) 45° c) $23\frac{1}{2}^{\circ}$

- 8) The Earth rotates on its -
a) Axis b) Equator c) Orbit
- 9) The Earth rotates from -
a) East to West b) Southwest to Northeast c) West to East
- 10) For rotating once the Earth takes -
a) 24 hours b) 24 minutes c) 24 seconds
- 11) Rotation causes the formation of -
a) leap years b) days and nights c) seasons
- 12) The part of the Earth facing the Sun enjoys -
a) day b) both day and night together c) night
- 13) Rotation does not cause the deflection of --
a) light b) ocean current c) wind
- 14) The part of the Earth which does not receive sunlight experiences -
a) day b) neither day nor night c) night
- 15) Rotation causes the formation of -
a) high tides only b) both high and low tides c) low tides only
