Lesson: Air, Water and Weather

WORKSHEET - 13

1. Fill in the blanks:-

- a) The changing of water vapour into water is called.....
- b) Tiny drops of water falling on the earth is called.....
- c) is one of the major sources of water.
- d) Evaporation is in open ponds than in cool, deep wells.
- e) The amount of water vapour in the air is called.....
- f) The changing of water into water vapour is called.....

2. Match the column:-

- a) The surface of water () the greater is the evaporation.
- b) The heat of the Sun () deeper lakes with small exposed surface.
- c) The hotter the day () than the water in a well.
- d) Evaporation is slower in smaller () it becomes water again.
- e) When water vapour cools () is exposed to the atmosphere and air.
- f) Water in a pond evaporates faster () evaporates water.

3. Name the following:-

- a) The amount of water vapour present in the air: -
- b) On a cold morning, we can see this on grass: -
- c) The water vapour condenses and falls to the ground in the form of tiny droplets of water: -
- d) In winter water vapour condenses on the dust particles close to the ground and forms: -
- e) In very cold places, water droplets freeze and form: -
- f) On very cold nights, water vapour freezes on the cold objects into ice crystals called: -
- g) It is one of the major sources of water: -

4. Draw, colour and label the diagram 'Water Cycle'

Ms. Margaret Das
