

I. Regroup and fill in the blanks.

1) $1184 + 2312 = 2312 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2) $2010 + 1002 = \underline{\hspace{2cm}} + 2010 = \underline{\hspace{2cm}}$

3) $4023 + 1500 = 1500 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4) $1093 + 3021 = \underline{\hspace{2cm}} + 1093 = \underline{\hspace{2cm}}$

5) $1000 + 2000 = 2000 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

II. Convert the following into Hindu-Arabic numerals.

1) XXIII =

2) CL =

3) DC =

4) CM =

5) LXV =

**III. Find the actual sum and the approximate sum of the following numbers:
(Here, round off the following numbers to the nearest 1000.)**

Follow the example given below:

1122 and 1010

<u>ACTUAL SUM</u>				
TH	H	T	O	
1	1	2	2	→
+	1	0	1	0
				→
2	1	3	2	→

Answer: 2132

<u>APPROXIMATE SUM</u>				
TH	H	T	O	
1	0	0	0	
+	1	0	0	0
2	0	0	0	

Answer: 2000

1) 1132 and 1210

2) 1813 and 1911

3) 1210 and 1023

4) 2930 and 2701

5) 4210 and 3200

IV. Solve.

1) $2402 + 1210 = \underline{\hspace{2cm}}$

2) $1726 + 1024 = \underline{\hspace{2cm}}$

3) $4580 + 1002 = \underline{\hspace{2cm}}$

4) $1610 + 1114 = \underline{\hspace{2cm}}$

5) $4012 + 1201 = \underline{\hspace{2cm}}$
