## JESUIT MINORITY INSTITUTION CLASS 5

TOPIC: FEEDING HABITS IN ANIMALS DATE: 23.04.2020

| <u>A.</u>   | 15x1=15   |                |  |  |  |  |  |
|---|---|----------------|--|--|--|--|--|
| 1.  | of the carnivorous birds help them to catch their prey and to tear flesh.         |                |  |  |  |  |  |
| 2   | a) Claws b)Beaks c)Wings  |                |  |  |  |  |  |
| ۷.  | Animals need to grow, to get energy and to stay healthy.  a) teeth b)food c)limbs |                |  |  |  |  |  |
| 3.  | like rabbits ,mice and squirrels have small and sharp front teeth.                |                |  |  |  |  |  |
|   | a)Herbivores b)Carnivores c) <b>Rodents</b>                                       |                |  |  |  |  |  |
| 4.  | . The feeding habits of the animals on the type of food they eat.                 |                |  |  |  |  |  |
|   | a) <b>depend</b> b)based c) reflecting  |                |  |  |  |  |  |
| 5.  | 5. Herbivores are animals that feed on  |                |  |  |  |  |  |
|   | a) skin b) <b>green plants</b> c) flesh   |                |  |  |  |  |  |
| 6.  | . Carnivores feed on the of the other animals.                                    |                |  |  |  |  |  |
|   | a) <b>flesh</b> b) fins c) limbs  |                |  |  |  |  |  |
| 7.  | . Herbivores have strong broad teeth for  |                |  |  |  |  |  |
|   | a) eating b) <b>chewing</b> c)biting  |                |  |  |  |  |  |
| 8.  | 8. Carnivores have strong teeth to chew the flesh and the bones of other animals. |                |  |  |  |  |  |
| O.  |   | other anniais. |  |  |  |  |  |
|   | a) biting b)catching c) <b>grinding</b>   |                |  |  |  |  |  |
| 9. Herbivores like cows, goats and giraffes have front teeth for biting.                        |   |                |  |  |  |  |  |
|   | a) <b>sharp</b> b)blunt c)broad   |                |  |  |  |  |  |
| 10. Carnivores like the lion, tiger and cat have very sharp, pointed and curved front teeth for |   |                |  |  |  |  |  |
|   |   |                |  |  |  |  |  |
|   | a)chewing b) <b>tearing flesh</b> c)grinding                                      |                |  |  |  |  |  |

| 11. The sharp and small front teeth of the Rodents are used to seeds and fruits.     |                    |              |                |                  |  |  |
|--|--------------------|--------------|----------------|------------------|--|--|
|  | a) eat             | b) chew      | c) <b>gnaw</b> |                  |  |  |
| 12. Flesh-eating birds like eagles, kites and vultures have strong , sharp andbeaks. |                    |              |                |                  |  |  |
|  | a) <b>hooked</b>   | b)point      | ed             | c)curved         |  |  |
| 13. The mouth parts of the animals are to the type of food they eat.                 |                    |              |                |                  |  |  |
|  | a) matched         | b) <b>su</b> | ited           | c) appropriate   |  |  |
| 14. The beaks and claws of birds are according to the kind of food they eat.         |                    |              |                |                  |  |  |
|  | a) <b>modified</b> | b)cha        | nged           | c)arranged       |  |  |
| 15. Capybara is an example of  |                    |              |                |                  |  |  |
|  | a) carnivore       | b) omi       | nivore         | c) <b>rodent</b> |  |  |
|  |                    |              |                |                  |  |  |
