

ST. LAWRENCEHIGH SCHOOL

			IINORITY INSTITUTION	Olassa IV
	•	Subject : Physics Date 10.06.2020	Worksheet-10	Class: IX
	•	Chapter : Heat		
	•	Answer the following qu	uestions (MCQ) :	(1×15)
	•	Question 1		
,	Questio	n 1		
		Celsius is	o raise the temperature of one gram	of a substance by one
Н	leat ene	ergy		
S	Specific	heat		
С	onvecti	on		
tl	nermal e	energy		
	Questic	on 2		
	Q. What answer	at is the definition of CONE	DUCTION?	
٧	Vhen he	eat is transferred from object	cts like rays of light or electromagne	etically.
	hot liq inks.	uid or air that expands, be	ecomes less dense, and rises or bed	comes more dense, and
٧	Vhen he	eat transfers from objects th	nat are touching.	
٧	Vhen he	eat transfers through the he	eater or AC in your house.	
,	Questic	on 3		
	Q. What	at is the definition of CONV	/ECTION	

When heat transfers through the heater or AC in your house.

When heat transfers from objects that are touching.

A hot liquid or air that expands, becomes less dense, and rises or becomes more dense, and sinks.

Question	n 4
Q. Wha	t is the definition of RADIATION
answer ch	noices
⊔ot liquia	Lor air that aypanda hagamaa loog danga and riggs or becomes more danga, and sinks
-	or air that expands, becomes less dense, and rises or becomes more dense, and sinks
	at is transferred from objects like rays of light or electromagnetically.
When hea	at transfers from objects that are touching.
When hea	at transfers through the heater or AC in your house.
Question	n 5
Q. How	many kinds of heat transfer are there?
1	
2	
3	
4 or more	
Question	6
Q. Heat	and Temperature are the same thing
	and Temperature are the same thing
Q. Heat	and Temperature are the same thing
Q. Heat	and Temperature are the same thing
Q. Heat answer ch	and Temperature are the same thing
Q. Heat answer ch True False Question	and Temperature are the same thing
Q. Heat answer ch True False Question	and Temperature are the same thing noices 1.7 t is temperature?
Q. Heat answer ch True False Question Q. Wha answer ch	and Temperature are the same thing noices 7 t is temperature? noices
Q. Heat answer change of the c	and Temperature are the same thing noices 7 t is temperature? noices or cold something is
Q. Heat answer change of the c	and Temperature are the same thing noices 7 t is temperature? noices
Q. Heat answer ch True False Question Q. Wha answer ch How hot co	and Temperature are the same thing noices 7 t is temperature? noices or cold something is
Q. Heat answer ch True False Question Q. Wha answer ch How hot co a number what I have	and Temperature are the same thing noices 1.7 It is temperature? noices or cold something is on a thermometer
Q. Heat answer ch True False Question Q. Wha answer ch How hot co a number what I have	and Temperature are the same thing noices 7 t is temperature? noices or cold something is on a thermometer we when I am sick about 30 degrees
Q. Heat answer ch True False Question Q. Wha answer ch How hot ch a number what I hav anything a	and Temperature are the same thing noices 7 t is temperature? noices or cold something is on a thermometer we when I am sick about 30 degrees

Question 9 Q. Which is more dense? answer choices Hot Liquid Cold Liquid Question 10 Q. Hot objects begin to cool asanswer choices cooler air is transferred to the hot object. thermal energy in the object is transferred to the surrounding air. atoms in the object react with the oxygen in the air. thermal energy in the object cancels out energy in the air Question 11 Q. The heat from a hot burner to a pot is transferred by ____ answer choices convection insulation radiation conduction Question 12 Q. The way the heat is moving from the hot coffee is called... answer choices convection radiation insulation conduction Question 13 Q. Insulation is used in the walls of a building to _____. answer choices

Something that absorbs heat.

trap solar energy

keep thermal energy from moving through the walls

conduct thermal energy

keep cold air from moving through the walls

Question 14

Q. Why do you want to live in a home with good insulation during the cold winter months? answer choices

The insulation will keep you cool during winter.

If there is good insulation, the thermal energy will not be able to move easily from inside the warm home to the cool areas outside the building.

If there is not good insulation, the air inside the home will become too hot.

A house with good insulation will keep the warm air in the attic.

Question 15

Q. When a popsicle melts, the particles _____.

answer choices

gain thermal energy and speed up there are no particles in popsicles

lose thermal energy and slow down

stay the same
