First Term

Answer Worksheet Number-4

The New Shoes

Sub: English Text

Class: 3

Date: 07.07.20

1. Answer the following questions:-

a. Name the two things that the man was very good at. How do we know that the man was a good Mathematician?

Ans. The man was very good at Mathematics and drawing sketches. He drew accurate sketches of his feet. He then carefully measured his foot and wrote the exact measurements of each foot on the sketches. This is how we know he was a good Mathematician.

b. Describe the man's journey and the incident at the market place?

Ans. It was past midday when the man arrived at the market place. When he reached the stall where shoes were being sold, the man realised that he had forgotten to bring the paper on which he had written his measurements. He turned around and walked all the way back home to get the paper.

c. What did the man do before he went to the market place? Where was the market?

Ans. Before leaving his house for the market place, like good mathematician, he rechecked his figures and measurements. The market from where the man wanted to buy the shoes was far away from his home.

d. 'Foolish man!' Explain the conversation between the man and the shoemaker?

Ans. The shoemaker calls the man a 'Foolish Man' because it was time for the market to close and he was asked to unpack the shoes that were being sold. The other reason, why the shoemaker called the man a foolish man was that, instead of trying on the shoes in the store, the man went back home to get the piece of paper on which he had written the measurements.
