

I. Regroup and fill in the blanks.

1) $2164 + 5212 = 5212 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2) $4061 + 1112 = \underline{\hspace{2cm}} + 4061 = \underline{\hspace{2cm}}$

3) $2091 + 2500 = 2500 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4) $3160 + 1010 = \underline{\hspace{2cm}} + 3160 = \underline{\hspace{2cm}}$

5) $2400 + 1002 = 1002 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

II. Convert the following into Hindu-Arabic numerals.

1) XIX =

2) XC =

3) LIV =

4) ML =

5) LV =

III. Find the actual sum and the approximate sum of the following numbers:

(Here, round off the following numbers to the nearest 1000.)

Follow the example given below:

1122 and 1010

<u>ACTUAL SUM</u>				
	T	H	T	O
	2	1	1	1
+	2	0	1	0
	2	1	3	2

Answer: 2132

<u>APPROXIMATE SUM</u>				
	T	H	T	O
	0	0	1	0
+	0	0	1	0
	0	0	2	0

Answer: 2000

1) 1226 and 1021

2) 1904 and 1710

3) 1020 and 1011

4) 3724 and 2812

5) 4216 and 2220

IV. Solve.

1) $2200 + 1610 = \underline{\hspace{2cm}}$

2) $1826 + 1254 = \underline{\hspace{2cm}}$

3) $3920 + 1102 =$ _____

4) $1421 + 1252 =$ _____

5) $3902 + 1103 =$ _____
