1. Mohan hired 55 male labourers and 22 female labourers to build his house. How many labourers were hired?

|  |  | $T$ | 0 |
| :--- | :--- | ---: | ---: |
| Number of male labourers | $=$ | 5 | 5 |
| Number of female labourers | $=$ | $+\underline{2}$ | 2 |
| $\therefore$ Number of labourers |  | $\underline{7}$ | 7 |

Answer:He hired 77 labourers in all.
2. There are 40 table clocks and 20 wall clocks in a clock store. How many clocks are in the clock store?

|  |  | $T$ | 0 |
| :--- | :--- | ---: | ---: |
| Number of table clocks | $=$ | 4 | 0 |
| Number of wall clocks | $=$ | $+\underline{2}$ | 0 |
| $\therefore$ Number of clocks |  | $\underline{6}$ | 0 |

Answer:There are 60 clocks in all.
