SUB: GENERAL SCIENCE

CLASS 5

F.M. 15

TOPIC: SEDIMENTARY ROCKS

DATE: 17.04.2020

A. CHOOSE THE CORRECT OPTION:

15x1=15

1. _____ rocks cover the major portion of the earth's land surface.
a) igneous b) **sedimentary** c) metamorphic
2. Sedimentary rocks are formed from pebbles, sand, mud or clay that are _____ in oceans.
a) **deposited** b) arranged c) originated
3. The layers during the formation of the sedimentary rocks are _____ together by minerals.
a) mixed b) **cemented** c) obtained
4. Certain kinds of Sedimentary rocks are formed from the _____ of tiny sea creatures.
a) organs b) wastes c) **shells**
5. Some kinds of sedimentary rocks are formed from _____ minerals that settle by the side of oceans.
a) **dissolved** b) existing c) deposited
6. _____ is a common sedimentary rock.
a) pumice b) marble c) **sandstone**
7. Sandstone mostly contains _____ grains.
a) granite b) **quartz** c) obsidian
8. The Red Fort in New Delhi is made of _____.
a) **sandstone** b) limestone c) conglomerate
9. _____ is a rock of uneven texture.
a) marble b) **conglomerate** c) shale

10. Which sedimentary rock found mostly in the shades of grey and orange?
a) Granite b) limestone c) **conglomerate**
11. _____ is used as an ornamental rock and for polishing ornaments.
a) **conglomerate** b) obsidian c) sandstone
12. _____ is made up of clay and mud particles that are piled up in layers.
a) limestone b) **shale** c) slate
13. Limestone is made up of a mineral called _____, which was once a part of animal shells.
a) feldspar b) fossils c) **calcite**
14. _____ is used for making bricks and glass, and for separating pure metals from their ores.
a) sandstone b) **limestone** c) chalk
15. The traces of ancient plants and animals found in rocks are called _____.
a) **fossils** b) tonsils c) vessels
