

ST.LAWRENCE HIGH SCHOOL

JESUIT MINORITY INSTITUTION

CLASS 6

WORKSHEET NO. :01

SUB: GENERAL SCIENCE

F.M. 15

TOPIC: PHYSICS- CH-1-MATTER

DATE: 16.01.2021

A. CHOOSE THE CORRECT OPTION:

15x1=15

- Anything that has mass and occupies space is known as _____.
a) weight b) matter c) atom
- _____ is the amount of matter contained in an object.
a) temperature b) moisture c) Mass
- The space occupied by an object is called its _____.
a) width b) area c) Volume
- A matter can have more mass even if it _____ lesser space.
a) occupies b) expels c) absorbs
- Iron ball has _____ mass than the ball of cotton.
a) average b) more c) less
- _____ is composed of extremely tiny particles called atoms and molecules.
a) Matter b) Paper c) Space
- _____ are the smallest possible units of matter that show all the properties of matter.
a) Particles b) Atoms c) Molecules
- Atoms do not always exist _____.
a) independently b) dependently c) at last
- _____ are the groups of atoms that show all the properties of matter and can exist independently.
a) Molecules b) Atoms c) Matter

10. There are _____ states of matter.

a)three b) two c)four

11. The space between the particles of matter is called _____.

a) intermolecular space b) intermolecular force c)particle space

12.The force of attraction between the particles of matter is called _____.

a)inter-particlespace b)intermolecular space c)intermolecular force

13. The intermolecular force of attraction _____ upon the intermolecular space.

a)depends b)lies c)is based

14. The greater the intermolecular space, the _____ will be the intermolecular force of attraction and vice versa.

a)higher b)less c)over

15. Atoms combine to form _____.

a) molecules b) matters c)factors
