WORKSHEET- 3

1ST Term

Class:3

Subject: SCIENCE

Date:18.02.2021

Parts of a Plant

1. Answer the following questions.

a. What do you understand by the shoot of a plant? What does the shoot consist of? What do you understand by stem? Name the two types of stems.

Ans.

b. Explain the difference between the two types of stems with the help of examples. What are the functions of the stem?

Ans.

c. Name some plants which store food in their stem and can be eaten. Give some examples of underground stems. What do you know about the size and shape of leaves? What do you understand by stomata? What is the function of stomata? Define photosynthesis.

Ans.

d. Why is a leaf called 'the food factory or kitchen of the plant'? What do you understand by chlorophyll? What is the function of chlorophyll? Which gas is released during the process of photosynthesis? Give some examples of plants which store food in their leaves and can be eaten.

Ans.

Ms. Susmita Subarno
