Sub: Life Science

Class: X

Date: 14.04.2020

CHAPTER: CONTROL & COORDINATION IN LIVING ORGANISMS TOPIC: CENTRAL NERVOUS
SYSTEM: PART1

WORKSHEET SOLUTION 7

Choose the correct option:

(1X15=15)

1. The folded bulges of the cerebral cortex is known as
c.Gyri
2. Which part of brain controls motor movement coordination ?
b.Cerebellum
3. Information processing mostly takes place in
d.Cerebral cortex
4. Connection between the right & left hemisphere is called
b.Corpus callosum
5. Which portion of brain influence the function of Pituitary gland?
b. Hypothalamus
6. Which of the following function is controlled by both right & left cerebral hemisphere?
b. touch
7. The part of brain which is located between the cerebral cortex & the midbrain is
b.Thalamus
- 8.Which is not the part of brain stem?
c.Thalamus
- 9.The forebrain does not include
c.Tectum
- 10.The supportive cells of brain are called
d.Both b & c
- 11.Higher faculty of mind like decision making is involved with
a. Frontal lobe
- 12.Alertness and sleep are controlled by
a. Thalamus
- 13.Which side of brain controls the functions of right part of our body?
b.Left side
- 14.Which part of cerebral cortex processes information from skin?
b. sensory cortex
- 15.Which of the following covers most of the part of upper skull?
b.Cerebrum
