

## ANSWER KEY – 33 TOPIC – NETWORKING

**SUBJECT: COMPUTER APPLICATION**  
**F.M.:15**

**CLASS: XII**  
**DATE: 30.06.2020**

➤ Choose the correct option:

(1X15=15)

1) A bulleted list can be made using:

- (a) <ol>                      **(b) <ul>**                      (c) <li>                      (d) None of these

2) A list whose individual lines are numbered can be made using:

- (a) <ol>**                      (b) <ul>                      (c) <li>                      (d) None of these

3) This tag is used to align a block of text:

- (a) <div>**                      (b) <align>                      (c) <dim>                      (d) None of these

4) This attribute of the list tag is used to select the style of numbering in an ordered list:

- (a) div                      (b) align                      **(c) type**                      (d) start

5) In an ordered list one has to use the \_\_\_\_\_ attribute to start a list with a number other than the first number:

- (a) div                      (b) align                      (c) type                      **(d) start**

6) <ol type = a start = 4> will start the list with the alphabet:

- (a) a                      (b) b                      (c) c                      **(d) d**

7) <ol type = i start = 5> will start the list with the character:

- (a) i                      (b) iii                      **(c) v**                      (d) ix

8) The HTML \_\_\_\_\_ tag defines the font size, color and face of text in the HTML document. :

- (a) <font>**                      (b) <text>                      (c) <format>                      (d) None of these

9) This tag is used to make text appear underlined:

- (a) <under>      **(b) <u>**      (c) <ulined>      (d) <underlined>

10) <ol type = I start = 4> will start the list with the character:

- (a) IV**      (b) iii      (c) iv      (d) 4

11) The extension of HTML document is:

- (a) .htm      (b) .html      **(c) both (a) & (b)**      (d) None of these

12) To indicate each line of the list \_\_\_\_\_ tag is used:

- (a) <ol>      (b) <ul>      **(c) <li>**      (d) None of these

13) <ol> is a/an \_\_\_\_\_ tag:

- (a) empty      **(b) container**      (c) root      (d) None of these

14) This tag is used to apply a heading or headline to a page:

- (a) <title>      (b) <part>      **(c) <h1>**      (d) <p>

15) <ul> is a/an \_\_\_\_\_ tag:

- (a) empty      **(b) container**      (c) root      (d) None of these
