## ST. LAWRENCE HIGH SCHOOL

## TOPIC -Profit \& Loss

## Subject : Mathematics

Class-9 First Term F. M. 15

WORKSHEET NO. - 10
Solutions
Date: 15.02.2021

## Q.1) Choose the correct option:

(1x15=15)
i) If 5 oranges are sold at the cost price of 6 oranges then what will be the profit\% or loss\%?
b) $20 \%$ profit
ii) There is $5 \%$ loss if an article is sold at₹ 22.80 . The cost price of the article is
b) ₹ 24
iii) If the ratio of the cost price and the selling price is 25:24 then rate of profit or loss percent is d) $4 \%$ loss
iv)If one dozen banana is purchased at ₹ 24 and each pair is sold at ₹ 5 then what percentage will be the profit or loss of the seller?
b) $25 \%$ profit
v) Madan incurred $10 \%$ loss by selling lemon at ₹ 18 per dozen. At what price should he sell each dozen of lemon to make a profit of $10 \%$ ?
c) ₹ 22
vi) If there is $20 \%$ profit on selling price then the rate of profit on cost price is
d) $25 \%$
vii) There is $20 \%$ loss if an article is sold at ₹ 480 . At what price should it be sold so that there is neither profit nor loss?
a)₹600
viii )There is $25 \%$ profit if an article is sold at ₹ 150 . At what percent should the selling price be increased so that there will be 30\% profit?
b) 4
ix) If a thing is sold at ₹ 510 , the loss is $15 \%$. The cost price of the thing is
d) $₹ 600$
x) A shopkeeper sold a thing at ₹ 440 and makes a profit of $10 \%$. If he wants to make a profit of $20 \%$, then the selling price of the thing will be
c) ₹ 480
xi) A shopkeeper bought 3 pens ₹ 10 and sold 5 pens at $₹ 20$. If he wants to make profit of $₹ 100$, how many pens should be sold?
d)none of these
xiilf the ratio of cost price to selling price be $4: 5$, then the profit percentage is $10 \%$
a) $25 \%$
xiii) The cost price of 16 books is equal to selling price of 20 books. Then the loss percent is
b) $20 \%$
