WORKSHEET – 17
TOPIC – NETWORKING

SUBJECT: COMPUTER APPLICATION   **CLASS: XII**
F.M.:15   **DATE: 11.06.2020**

➢ **Choose the correct option:**   **(1X15=15)**

1) These Servers usually store files & allow them to be accessed by other computers:
(a) File   (b) Print   (c) Communication   (d) None of these

2) These Servers are used to allow networked computers to share one or more common printers:
(a) File   (b) Print   (c) Communication   (d) None of these

3) These Servers are used to connect networks over long distances:
(a) File   (b) Print   (c) Communication   (d) None of these

4) These servers under file server are used to carry out various data processing jobs for the client computer:
(a) Database   (b) Application   (c) CD ROM   (d) None of these

5) These servers under file server stores common application programs that are shared by different client computers:
(a) Database   (b) Application   (c) CD ROM   (d) None of these

6) These servers under file server has multiple optical drives running several optical discs at a time to serve more than one client computer at any given time:
(a) Database   (b) Application   (c) CD ROM   (d) None of these

7) Proxy server is an example of _____ server:
(a) File   (b) Print   (c) Communication   (d) None of these

8) A personal computer in networking that connects to the server and uses the network services to perform user's tasks is a _____ computer:
(a) point-to-point   (b) Baseband   (c) Broadband   (d) client

9) A client can be a _____ terminal which acts only as an input and output interface:
(a) dumb   (b) simplex   (c) asynchronous   (d) synchronous

10) A _____is usually a powerful computer, that is dedicated to managing network resources:
(a) server   (b) simplex   (c) asynchronous   (d) synchronous

11) E-mail server is an example of _____ server.:
(a) File   (b) Print   (c) Communication   (d) None of these

12) _____ are used to provide various services to other computer in the network:
(a) server   (b) client   (c) dumb terminal   (d) None of these

13) In this transmission the entire bandwidth of the communication channel is used to send only one digital signal:
(a) Baseband   (b) Broadband   (c) asynchronous   (d) synchronous

14) _____ can be a computer terminal running its own application pogram:
(a) DNS Server   (b) Print Server   (c) File Server   (d) Workstations

15) DNS server is an example of _____ server.:
(a) File   (b) Print   (c) Communication   (d) None of these
