**Answer Worksheet -- 25**

Date: 01.12.2020

Lesson: The Eastern States of India Topic: Sikkim and Arunachal Pradesh

---

## 1 Write short note on the following

### Sikkim

Sikkim is one of the smallest state located in the north – eastern part of India. West Bengal is the neighbouring state of Sikkim. Gangtok is the capital of Sikkim. Kanchenjunga is the highest peak that lies on Sikkim's border. Major rivers that flow through this state are Tista and Rangeet. Sikkim is one of the largest producers of cardamom in the world.

### Pass

A pass is the lowest point in a range of mountain. Passes are of great help to travellers. It is also of great help to traders wanting to cross high mountain ranges. The Rohtang Pass is in Himachal Pradesh. The Nathu La pass is in Sikkim. Both are important passes in the Himalayas.

## 2 Answer the following question

**Name the capital of Arunachal Pradesh. Name the other important cities of Arunachal Pradesh. Name the highest peak in the state. Name the main river that flows through the state. Name any two tributaries of River Brahmaputra.**

Itanagar is the capital of Arunachal Pradesh.

The other important cities of Arunachal Pradesh are Tawang, Bomdila and Bhalukpong.

Kangto is the highest peak in the state.

River Brahmaputra flows through the state.

The tributaries of Brahmaputra are Lohit, Subansiri, Tirap and Kameng ( name any two ).

## 3 Name the forest found at lower altitude in Arunachal Pradesh. Name the rare species found in the forest of Arunachal Pradesh. What is the main occupation of the people of Arunachal Pradesh? Name the main crops grown here.

Pine forests are found in abundance at lower altitude in Arunachal Pradesh.

Rare species of orchids and rhododendrons are found in the forest of Arunachal Pradesh.

The main occupation of the people of Arunachal Pradesh is agriculture.

The main crops grown are rice, corn, millet and buckweed. Oilseed, potatoe, ginger, sugarcane and vegetables.
