WORKSHEET – 47
TOPIC – VISUAL BASIC

SUBJECT: COMPUTER APPLICATION   **CLASS: XI**
F.M.: 15   **DATE: 16.11.2020**

> **Choose the correct option:**   (1X15=15)

1) These are memory locations which are used to store values temporarily:
(a) Tapes   (b) Mstores   (c) Variables   (d) None of these

2) A variable name should not exceed _____ characters:
(a) 255   (b) 265   (c) 256   (d) 355

3) Declaring a variable tells VB to reserve space in _____:
(a) Memory   (b) CD   (c) Pendrive   (d) None of these

4) The variables are declared with this statement:
(a) int   (b) Dim   (c) store   (d) variable

5) This clause in the Dim statement allows defining the data type of the variable:
(a) As Storage   (b) As Data Type   (c) As Data   (d) As Type

6) This determines the kind of data a variable can store:
(a) Data type   (b) Variable type   (c) Storage type   (d) None of these

7) This data type is used to store date and time values:
(a) Date   (b) Time   (c) Date - Time   (d) None of these

8) This data type is used to store alphanumeric values:
(a) Thread   (b) String   (c) Character   (d) None of these

9) These operators are used when a comparison is done between two variables or expressions:
(a) Arithmetic   (b) Relational   (c) Logical   (d) None of these

10) These operators are used to combine two or more conditions to generate the final result:
(a) Arithmetic   (b) Relational   (c) Logical   (d) None of these

11) This is a numeric data type to store integer values in the range of 0 to 255:
(a) Integer   (b) Single   (c) Long   (d) Byte

12) OR is a _____ operator:
(a) Relational   (b) Logical   (c) Arithmetic   (d) None of these

13) The following is a type of arithmetic operator:
(a) +   (b) AND   (c) >=   (d) None of these

14) The following is a type of relational operator:
(a) +   (b) AND   (c) >=   (d) None of these

15) The following is a type of logical operator:
(a) +   (b) AND   (c) >=   (d) None of these
