

# ST. LAWRENCE HIGH SCHOOL

A JESUIT CHRISTIAN MINORITY INSTITUTION  
27, BALLYGUNGE CIRCULAR ROAD, KOLKATA - 700019

## ANSWER: WORKSHEET- 5 2<sup>nd</sup> Term

Class: 3

Subject: SCIENCE

Date: 08.05.2020

### BIRDS

#### 1. Fill in the blanks:

- Birds have two feet with claws.
- The claws help them to perch on trees.
- Birds use their claw to hold food while they eat.
- Birds also use their claw to scratch the ground to find worms.
- Vultures and eagles have sharp and curved claws called talons.
- Webbed feet help the water birds to swim in water and waddle in land.
- Ducks' feet have no nerves or blood vessels.
- An ornithologist is a person who studies or is an expert on birds.
- An owl comes out at night to look for its food.
- Hummingbirds and sunbirds drink nectar of flowers.

#### 2. Give two examples of:

- Birds which have talons. **Vulture and Eagle**
- Birds that dig the ground to get their food. **Hen and Rooster**
- Birds which use their feet to perch on trees. **Crow and Sparrow**
- Water birds with webbed feet. **Duck and Swan**
- Birds which have long legs and long thin toes which help them to wade through muddy water without getting wet. **Crane and Heron**

#### 3. Write True or False.

- Sharp, curved nails on the feet of birds are called claws. **True**
- Ducks have feet where the fingers or toes are joined by skin. **True**
- Cranes and Herons have talons. **False**
- Waddle is to walk using short steps while rocking from side to side. **True**
- Birds use their claws to feed their young ones. **False**
