WORKSHEET – 48
TOPIC – VISUAL BASIC

SUBJECT: COMPUTER APPLICATION　　　　　　　　　　　　**CLASS: XI**
F.M.: 15　　　　　　　　　　　　　　　　　　　　　　　**DATE: 21.11.2020**

➢ **Choose the correct option:**　　　　　　　　　　　　　　　　**(1X15=15)**

1) For…Next is a type of _____ statement:
(a) Relational　　　　(b) Logical　　(c) Arithmetic　　　(d) Control

2) Using InputBox command text is displayed as the message in the dialog box due to the following:
(a) Title　　　　(b) Prompt　　　　(c) DefaultValue　　　(d) None of these

3) This part of InputBox command gives the title in the title bar of the dialog box:
(a) Title　　　　(b) Prompt　　　　(c) DefaultValue　　　(d) None of these

4) Do Until…Loop is a type of _____ statement:
(a)) Relational　　　(b) Control　　　(c) Arithmetic　　(d) None of these

5) This command is used to accept text value in a dialog box:
(a) InputBox　　　(b) PutBox　　　(c) InBox　　　(d) None of these

6) _____ statements are used to control the flow of program execution:
(a) Handling　　　(b) Alter　　　(c) Control　　(d) None of these

7) This is called the conditional statement because it is used to take decision depending upon specified condition:
(a) TextBox　　　(b) InputBox　　　(c) print　　　(d) if..else

8) This data type is used to store alphanumeric values:
(a) Thread　　　　(b) String　　　(c) Character　　(d) None of these

9) This command is used to convert the text into a number format so that the calculation can be performed:
(a) Mod　　　　(b) Val　　　(c) Numerical　　(d) None of these

10) This clause in the Dim statement allows defining the data type of the variable:
(a) As Storage　　　(b) As Data Type　　(c) As Data　　(d) As Type

11) This is a numeric data type to store integer values in the range of 0 to 255:
(a) Integer   (b) Single   (c) Long   (d) Byte

12) Do While is a type of _____ statement:
(a) Relational   (b) Logical   (c) Arithmetic   (d) Control

13) This part of InputBox command gives the default text that appears in the imput field, which the user may change:
(a) Title   (b) Prompt   (c) DefaultValue   (d) None of these

14) The variables are declared with this statement:
(a) int   (b) Dim   (c) store   (d) variable

15) The following is a type of arithmetic operator:
(a) +   (b) AND   (c) >=   (d) None of these
