

ST. LAWRENCE HIGH SCHOOL

A JESUIT CHRISTIAN MINORITY INSTITUTION

WORKSHEET SOLUTION (CLASS-10)

TOPIC- METALLURGY

SUBJECT – PHYSICAL SCIENCE

DURATION – 30 mins

F.M. - 15

DATE – 14.11.20

1. Most of the plants contain:

- a. Potassium

2. Malachite is mineral containing:

- c. Copper

3. The most electropositive alkali metal is:

- a. Cs

4. Which of the following is not the ore of magnesium?

- c. Gypsum

5. Calcium oxide is called:

- b. Quick lime

6. Heating of pyrites to remove sulphur is called:

- a. Roasting

7. The element which is sometimes found in native state is:

- b. Cu

8. Which of the following is not the ore of calcium?

- d. Carnalite

9. The chief ore of aluminium is:

- b. Bauxite

10. Baeyer's process is used for the purification of:

b. Aluminium

11. Alumina is:

d. amphoteric

12. Pig iron is also called:

b. Cast Iron

13. Blast furnace is used in the metallurgy of:

c. Iron

14. One of the following is not the ore of copper:

d. Corundum

15. Which of the following elements is present in haemoglobin?

b. Fe
