

I. Fill in the blanks.

- 1) $1482 + \underline{\hspace{2cm}} = 1110 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
- 2) $7210 - 2200 = \underline{\hspace{2cm}}$
- 3) $(240 + 460) + \underline{\hspace{2cm}} = 524 + (460 + \underline{\hspace{2cm}}) = \underline{\hspace{2cm}}$
- 4) $1202 + 1426 = \underline{\hspace{2cm}} + 1202 = \underline{\hspace{2cm}}$
- 5) $480 - 160 = \underline{\hspace{2cm}}$

II. Write the following in Roman numerals.

- 1) 74 =
- 2) 97 =
- 3) 62 =
- 4) 59 =
- 5) 562 =

**III. A) Find the actual difference and the approximate difference of the following numbers:
(Here, round off the following numbers to the nearest 1000.)**

- 1) 2886 and 1664
- 2) 7890 and 7356

**B) Find the actual sum and the approximate sum of the following numbers:
(Here, round off the following numbers to the nearest 1000.)**

- 1) 4561 and 2410
- 2) 4322 and 1122

IV. Solve.

(Hint: When a sum has both addition and subtraction. First we add, then we subtract from the sum.
You must show all the steps while solving the sum. Do not skip any of the steps.)

- 1) $1862 - 2420 + 2122$
- 2) $1451 - 2341 + 1800$
- 3) $1567 - 2789 + 1910$
- 4) $1172 - 1351 + 1004$

V. Word Problem

- 1) There are 4450 books on literature and 1230 other books in a library. How many books are there in all?
- 2) Adam's mobile has 6462 songs and Tina's mobile has 1226 songs. Whose mobile has more songs?
How many more?
