

# ST. LAWRENCE HIGH SCHOOL

A JESUIT CHRISTIAN MINORITY INSTITUTION  
27, BALLYGUNGE CIRCULAR ROAD, KOLKATA - 700019

## ANSWER: WORKSHEET- 9 2<sup>nd</sup> Term

Class: 3

Subject: SCIENCE

Date: 13.05.2020

### HOUSING AND CLOTHING

#### 1. Fill in the blanks.

- We all need a house to live in.
- Pucca houses are made of bricks and cement.
- Houses in the hills have sloping roofs.
- Stilt houses are built on wooden posts called stilts.
- Kutchha houses are made of mud and straws.
- Stilts save the house from getting flooded.
- In hilly areas houses have sloping roofs made of tiles.
- Stilt houses are built on areas which have heavy rainfall.
- Sloping roofs in the hilly areas let the water and snow slide off easily.
- An igloo is a dome - shaped building built with ice blocks.

#### 2. Match the columns.

Column A		Column B
a. Igloos	e	Strong houses
b. Stilt houses	c	Hilly areas
c. Sloping roofs	b	Areas of heavy rainfall
d. Kutchha houses	a	Blocks of ice
e. Pucca houses	d	Weak houses

#### 3. State whether True or False.

- People living in different regions and climates make the same kind of houses. False
- Kutchha houses are strong and cannot be damaged by storms, rains and floods. False
- Eskimos live in igloos. True
- An igloo has a short door and tunnel in front of the dome structure. True
- Strong houses are not easily damaged, even during storm and floods. True
