

ST. LAWRENCE HIGH SCHOOL

A JESUIT CHRISTIAN MINORITY INSTITUTION

2020

Chapter: Mountains and Rift Valleys

Worksheet number: 1

Solutions

Date: 29/04/2020

Class: 6

Term: II

Sub: Geography

Choose the correct answer:

1x15=15

1. The internal processes originate (over/ around/ **deep inside**) the surface of the earth.
2. The slow movement builds (**continents**/ earthquake/ volcanic eruption).
3. Vertical movements form (folds/ fold mountains/ **faults**).
4. Rift valleys are formed by (**vertical**/ horizontal/ angular) movement.
5. Weathering is a part of (endogenous/ **exogenous**/ orogenous) process.
6. One agent of gradation is (**water**/ fire/ earthquake).
7. The word “epeiros” means (**continent**/ plateau/ valley).
8. The orogenic movement was caused by (vertical/ **horizontal**/ tensional) forces.
9. The fold mountains are formed as a result of (tension/ **compression**/ vertical) forces.
10. Fold mountains are mainly formed of (volcanic/ **sedimentary**/ metamorphic) rocks.
11. Anticlines are called (**upfolds**/ downfolds/ trough).
12. Synclines are called (ridges/ **trough**/ upfolds).
13. The process of orogenesis includes (uplift/ crustal deformation/ **both**) movement(s).
14. The mass movement is considered as (**external**/ internal/ horizontal) movement.
15. The process of mass movement is a (fast/ sudden/ **slow**) movement operating under gravity.
