A. Answer the following questions below:

Q1. You have read that the moon and sun are up in the sky. Can you think and write of things that we can see in the sky and when do we see them?

During the day we can see white clouds, blue sky and

birds flying. At night we can see the stars and clouds

moving. The days it rains we see black clouds, lightning,

thunder and strong winds moving.

Q2. Why was the Sun and Moon called lovely and old?

The Sun and Moon were always there on Earth, even before

human beings. In this way they are old. They are called lovely

because they look very nice to the eyes.
