

ST. LAWRENCE HIGH SCHOOL

TOPIC – Theorems on Area

Subject : Mathematics

Class-9 Second term F. M. 15

WORKSHEET NO. - 6

Solutions

Date: 05.07.21

Q.1) Choose the correct option:

(1x15=15)

- i) PQRS is a trapezium where $PS \parallel QR$. X is the midpoint of SR. If $\Delta XPS + \Delta XQR = 30 \text{ sq. cm}$ then the area of the trapezium PQRS will be _____
d) 60 sq. cm
- ii) In a ΔABC , D, E and F are the midpoints of the sides BC, CA and AB. If the area of ΔCDF is 7 sq. cm, then the area of ΔABC is _____
b) 28 sq. cm
- iii) In ΔPQR , S is the midpoint of QR. Also T, M and N are the midpoints of SR, RT and PM. If the area of ΔPQR is 7 sq. cm, then the area of ΔABC will be _____
b) 28 sq. cm
- iv) In a parallelogram ABCD, P is any point on the side AD. If the area of the parallelogram is 40 sq. cm, then the sum of the areas of ΔABP and ΔDCP is _____
a) 20 sq. cm
- v) ABCD is a trapezium whose $AD \parallel BC$. If $\Delta ADB = 30 \text{ sq. cm}$, then ΔADC will be _____, 1
d) 30 sq. cm
- vi) The base of a parallelogram and a rectangle is 20 cm and they are situated between same parallels. If the area of the rectangle is 600 sq. cm, then the height of the parallelogram with respect to base is _____
c) 30 cm
- vii) In ΔPQR , O is the midpoint on the side QR such that $2 QO = 3 OR$. Then the ratio of the areas of ΔPQO and ΔPOR is _____
b) 3 : 2
- viii) In ΔABC , D and E are such points of AB and AC that $\Delta DBC = \Delta EBC$. If $BC = 12 \text{ cm}$, then $DE =$ _____
c) 6 cm
- ix) In trapezium ABCD, $AD \parallel BC$ and $AD = \frac{1}{2}BC$. If $\Delta ABC = 16 \text{ sq. cm}$ then area of trapezium will be _____
a) 24 sq. cm
- x) In trapezium ABCD, $AD \parallel BC$. If P is the midpoint of DC then ΔPBC : area of trapezium ABCD is _____
d) 1 : 2
- xi) Between the same base and same parallels, the area of the triangle will be _____ the area of the parallelogram.
b) half
- xii) Between the same base and same parallels, the area of a square and area of a rhombus are _____
a) equal
- xiii) ABCD is a parallelogram. The midpoint of AD is P. If the area of the parallelogram is 48 sq. units, then the area of ΔACP is _____ sq. units.
d) 12
- xiv) The median of a triangle divides the triangle into two triangles of _____ area.
b) equal
- xv) The area of a parallelogram ABCD is 32 sq. cm. E is the midpoint of the side BC. Area of ΔABE is _____
c) 8 sq. cm
